Kommentar:

I den här texten använder eleven nästan alla uppgiftens punkter, och skapar, med ett enkelt språk, ett visst sammanhang. Texten är relativt kortfattad, men en punkt som främst utvecklas är *a special memory*, där eleven blommar ut och beskriver två olika minnen med vännen och de båda familjerna, vilket tillsammans med förklaringar bidrar till tydlighet (*becous the whater war blue and turkei; The water was olso hot*).

Texten inleds med en presentation av vad den ska handla om, där eleven vänder sig till en mottagare och rundas av med en förklarande beskrivning (*But i dont see her som mutch becous she livs in X whish is in X*). Detta kan ses som en kommunikativ strategi. Dessutom används och omformuleras fraser från uppgiften, vilket förbättrar interaktionen (*She is my bestfriend; My best memory with her*).

Språkligt sett uppvisar eleven ett grundläggande förråd av ord och fraser även om en viss påverkan av svenskan syns (*Daht we do thogether; for ... ago*). Meningslängden är varierad och meningarna inleds på olika sätt vilket bidrar till att texten får ett visst flöde. Eleven använder ett flertal bindeord och tidsuttryck (*becuse she is allways so nice and happy; And when my family*), vilket visar på orsaksförhållanden och ger texten ett visst sammanhang.

Vad gäller språkets precision använder eleven sig av flera olika tempus (futurum, presens, preteritum och perfekt) även om en viss osäkerhet föreligger (*we going to; we wine; her family fly to ... for one and a half yers ago*). Stavningen är till stora delar mycket ojämn, vilket påverkar tydligheten (*Im going to right; be in the bich; We have bin; I fink dath*). Eleven använder ett par olika pronomen på ett riktigt sätt (*her family; whish is in X*).

Den sammantagna bedömningen blir att eleven visar förmåga att berätta och beskriva och i det sammanhanget formulera sig relativt tydligt och till viss del sammanhängande. Med fungerande strategier uttrycker sig eleven relativt tydligt med ord fraser och meningar. Texten bedöms därför uppfylla gällande kunskapskrav för betygssteget C.

Friends

I think a real friend should be someone you can trust. I often go outside with my best friends and bicycling. Sometimes we go to a school and sometimes to shops. I think me and my best friend still will be friends in future! I met him when I was 2 or 3 years old. I played with him on the pre school. My friend and I have the same hobbies. We like to bicycling and talk. His name is X. We have been best friends for like 4 years now and I think we are going to be friends in the rest of our lives!

My friend X

X is one of my best friends. We have been friends since we were like three/four years old. She is one year older but we are still good friends. Our two years younger little brother goes in the same class in school and they are best friends too. I think that has done so we are better friends now. I don't really remember how we met each other or how we became friends. But now when we go to the same school we are still meeting each other.

Why we are so good friends I think is because we think the same things are to be funny or boring. We both go to a dance school so we can learn the dance together, both at home and in the school.

A special memory I have with X was when she and her family were in my family's summer house. We swam in the sea, we had a water war, ate ice cream and so much more fun. Our brother could play football and we could do a short movie. So it was perfect, we have done this thing like five or more times.

I think we will be best friends in like two more years and then only friends. Because I think we will grow up from each other when our brother is meeting each other.

X is a good friend because she is nice and doesn't get angry so easily. And she will not leave me without saying it.

I hope my friends think I'm a good friend too. And I think that because I don't leave anyone and I want that everyone is going to be happy so I help them.
