REPORT OF NEON MINI-MEETING

We hereby report to the working group that we had a very productive all day NEON mini-meeting today, April 10 2014 at the Center for Health Equity Studies in Stockholm (CHES).

Ilona Koupil and Pia Chaparro (both from CHES), Lotta Moraeus and Lauren Lissner (from GU-EPI) and Agneta Sjöberg (from GU-IKI) participated in the meeting.

We started with a presentation by Agneta Sjöberg, on the Grow up Gothenburg study. We continued with a long brainstorming session and came up with several interesting ways of collaborating in the future. The main topic was how Statistics Sweden can help us link socioeconomic data to the Grow-up cohort.. We think it will lead to future fruitful collaborations between Gothenburg nutritional epidemiologists and CHES.
