

CENTRE FOR ANTIBIOTIC  
RESISTANCE RESEARCH  
IN GOTHENBURGH, CARe

# Social Microbes

*What are they and what can they do (for you)?*

CARe invites to an open interdisciplinary workshop on translating the social study of microbes across research areas and practices together with the *Nordic Network for the Social Study of Microbes*

**October 3, 2023**

8:30-13 (including coffee and lunch mingle)

Torgny Segerstedtsalen

University of Gothenburg, Main building, Vasaparken 1

The social study of microbes (SSM) uses qualitative, analytic and artistic critical methods to investigate how humans, cultures and societies do and may conceive of and relate to the microbial world around and inside us, in emotions, thinking and practice. This workshop presents SSM and explores how it may translate to and from other research approaches and disciplines, as well as related practices, such as *antimicrobial resistance* policy and practice, *one health* policies related to global public health or environmental concerns, as well as the hot topic of global social *pandemic preparedness and response*. Learn more about the Nordic network for SSM here: <https://www.socialmicrobes.org/projects/nordic-network-for-the-social-study-of-microbes/>

## Keynotes and commentators

Kari Lancaster, Social Studies of Health, University of South Wales

Salla Sariola, Centre for the Social Study of Microbes, University of Helsinki

Andrea Butcher, Centre for the Social Study of Microbes, University of Helsinki

Camilla Brudin Borg, Environmental humanities, GU

Joakim Larsson, Sahlgrenska Academy & CARe

Jon Pierre, Political science, GU & CARe

Participation is free of charge and includes coffee and lunch. Places are, however, limited. Send your (binding) registration at the latest August 31, via the form at the workshop web page:
