The SOM Institute

The SOM Institute at the University of Gothenburg, founded in 1986, conducts interdisciplinary survey research and organizes seminars on the topics of Society, Opinion and Media (SOM). The Institute is jointly managed by the Department of Journalism, Media and Communication and the Department of Political Science at the University of Gothenburg.

Organisation

The Institute is headed by Professor Annika Bergström. Members of the steering committee are Professor Bengt Johansson, The Department of Journalism, Media and Communication, University of Gothenburg, assistant professor Love Christensen, The Department of Political Science, University of Gothenburg, Anders Lithner, CEO Brand Metrics and Associate Professor Marie Grusell, The Department of Journalism, Media and Communication, University of Gothenburg.

The National SOM Surveys

From 1986, the core of the SOM Institute has been an annual nationwide survey, carried out every autumn in the form of a mail questionnaire addressed to randomly selected persons from the age of 16 and up living in Sweden. The survey consists of several sub-surveys, which since 2022 each comprise a sample of 3 750 respondents. In 2024 there were seven such sub-surveys, resulting in a total sample size of 26 250 persons.

Research

The central questions addressed in National SOM are attitudes toward mass media, politics and public services. A report summarizing the main results of each year's survey is published annually and available from the SOM Institute web page (www.gu.se/en/som-institute). The data files from the surveys are deposited at the Swedish National Data Service (www.snd.gu.se) in Gothenburg and may be ordered for scientific research.

Infrastructure

The SOM Institute is part of the Swedish national research infrastructure. Researchers and research projects are invited to co-operate with the surveys, and thereby access high quality data, mainly within the area of social sciences. The SOM staff plan the surveys, design questionnaires and work with quality control and refinement of the gathered data. The questionnaires are constructed in close collaboration with participating research projects. It is of great importance to the SOM Institute to be transparent in all parts of our work. Questionnaires and reports are made available on the web page and each survey is well documented in methods sections of our publications.
