

SAHLGRENKA AKADEMIN INSTITUTIONEN FÖR BIOMEDICIN

Utlysning

Project Title: MAIT cell function in colorectal cancer

Project duration and dates: 4 months, April 15, 2026 to August 15, 2026

Application deadline: April 7, 2026

Amount: 80 000

Project summary: The project entails studies of MAIT cells from colorectal cancer patients and healthy volunteers. Flow cytometry will be used to evaluate MAIT cell phenotype and function, and correlations made to tumor and patient characteristics.

Applicant: The eligible student should have an MSc degree in molecular biology, cell biology, or a similar subject, and have completed immunology course(s) of at least 15 hsp (10 weeks).

Application:

Applications should be emailed to Marianne Quiding Järbrink (Marianne.quidign@microbio.gu.se). The application should include Motivation letter and CV including contact info.
