Summary

I am a professor of environmental economics in Gothenburg. I have during three decades built up the Unit for Environmental Economics with a staff of about a dozen PhDs and a number of graduate students. We have trained more five dozen PhDs in a unique PhD program in environmental economics, most of them from developing countries (financed by the Swedish International Development Cooperation Agency, Sida) as well as many masters and undergraduate students. We have created a world-wide network of environmental economics called Environment for Development.

Gothenburg has twice hosted very large international conferences: 2008 we arranged the European EAERE conference and 2018 the World Conference of Environmental and Resource Economics. With 1500 participants it was the biggest ever! For the academic year 2015-2016 I was elected to a guest professorship at the Collège de France. 2011-2014 was spent in part on the AR5 of the IPCC where I was CLA of chapter 15 on policy instruments. 2012-2013 I was on sabbatical leave from Gothenburg and worked as Chief Economist at the Environmental Defense Fund in New York. My main areas of work are instrument design for climate and environmental policy, catch shares in fisheries and the theory of discounting.

I have published over 140 articles in refereed journals, authored or edited more than a dozen fifteen books and a large number of book chapters and official reports. I have also authored my share of journalistic articles ranging from having my own opinion piece in local media to writing for New York Times, FT, Le Monde or the Times. The main focus of my work is on environmental policy instruments with applications to energy and climate, industry, transport economics and finally resource management in developing countries. Many of these areas benefit substantially from interdisciplinary collaboration with natural scientists, engineers, medical or other experts and this is a very enjoyable and exciting part of professional life.

I teach courses in natural resource economics and environmental policy at the graduate and undergraduate levels. I have been the advisor for over three dozen PhD theses and I do quite a lot of external lecturing and consulting.

Funding and organisation in Gothenburg

The Environmental Economics Unit I have started in Gothenburg has been the largest recipient of external funding in the University of Gothenburg according to surveys by GU. A large share of this has come from Sida, the Swedish International Development Cooperation Agency. Our goal is to create and enhance environmental economic capacity in developing countries. With finance from Sida, EEU has run a PhD program for students from developing countries focused particularly on environmental and climate economics that is described below. In order to make the best use of the capacity created, we (Gunnar Köhlin me and others in the EEU) have, again with funding from Sida, created the Environment for Development initiative which is a network of environmental economists focused on development. It has 15 centres in the Global South and a number of partner universities in the North. In Gothenburg it is a separate unit within the School of Economics. In addition our activities have generated other offshoots with which we continue to collaborate closely such as the Environmental Economics and Policy Group at the Gothenburg Centre for Sustainable Development.

The Environmental Economics Unit has also been successful in attracting considerable research funds from various research boards such as AFR, BFR, DFE, FORMAS, Efn, FRN, KFB, SAREC, SNV, the municipality of Gothenburg, the EU, MISTRA and others. In addition to this I am, and have been, involved with a large number of other projects. Among the most important are MISTRA Carbon Exit, CHIPS (EU Horizon/Formas) and Länsförsäkringar. Most recently we received founding from Kaprads stiftelse.

Consultancy

Outside of my dayjob at the university I run a small consultancy company, Sterner Environmental Economics (Sterner Miljö och Hållbarhet Handelsbolag, SME). I have had many consultancy tasks for organizations and companies such as the Geneva Association,

Göteborg Energi, Volvo, Swedpower, Nynäs, Environmental Defense Fund, Länsparbanken, Länsförsäkringar, Naturvårdsverket, Riksrevisionen, the OECD, the World Bank and several Swedish ministries including the Ministries for finances, environment and agriculture and the Research Council of Norway. I have led a large forecasting and modelling consultancy for Swedpower in which we built forecasting models for electricity demand in Mexico for the Comisión Federal de Electricidad. Recently I have helped in legal cases consulting with law firms such as Delphi.

Teaching and Supervision

Current Teaching

- Masters course in **Environmental Economic Policy Instruments,** each spring at the University of Chalmers. Next course starts January 2025.

In addition I used to teach the following PhD courses:

- Graduate course in Natural Resource Economics.
- Graduate course in Environmental Economic Policy Instruments.

Currently these are only given as reading courses.

Finally, I occasionally teach short courses on environmental policy organized by the World Bank and other organizations in Washington, Paris, Livingstone, Bangkok, Zaragoza, Oaxaca, Turrialba and La Habana, see D78, D89, D97, D113, D117, D121, D151, D155 and D227.

During the years I have held various posts at the Department of Economics I have taught a variety of first year courses. I have also taught, either in Gothenburg or in other universities, various advanced courses in micro, development economics, transport economics and energy economics. Since many years I serve as an external examiner for the African Economic Research Consortium AERC.

Masters and undergraduate Supervision

There have been many students but I have no complete list. Recently I had the following students as interns or supervised their theses:

- Mai Onuki (2024, Intern, GU)
- Justine Bourdenet (2024, Intern. PSE, Paris)
- Zélie Gankon Sieyadjeu (2024, Intern, Dauphine, Paris)

PhD Supervision

My main teaching task is the supervision of a large number of PhD students. We have had many PhD students in environmental economics supervised by me and other supervisors at the EEU. The following is a list of 39 PhD students I have supervised in the past, either as their main supervisor or as a co-supervisor. Below that is a group supervised within my research group but not by me. In total they are 71 theses since 1988. 17 of them were Swedes.

Currently I am second supervisor for Simon Disque at ETH in Zurich.

71. **Jens Ewald**
"" Opposition to Carbon Pricing: Beliefs, Revenues, and Protesters" *June 10 2025. Discussant Timo Goeschl. Committee: Fredrik Carlsson, Kathleen Schubert and Mads Greaker.*

70. **Ruijie Tian**
"Impacts of Climate Policy and Natural Disaster: Evidence from China", 10 September 2021. Discussant: Dallas Burtraw, Senior Fellow at Resources for the Future, RFF. Committee: Åsa Löfgren, Frank Convery, and Mads Greaker.

69. **Samson Mukanjari**
"Climate policy and financial markets", 28 January 2020. John Hassler secondary supervisor. Discussant: Professor Armon Rezai, Department of Socio-Economics, Vienna University of Economics and Business (WU Wien). Committee: Olof Johansson Stenman, Bo Becker and Anna Creti.

68. **Daniel Slunge**
"Essays in Environmental Management and Economics: Public Health, Risk and Strategic Environmental Assessment", 8 September 2017. Discussant: Professor Peter Clinch, Earth Institute, University College Dublin, Ireland. Committee: Marc Jeuland, Jessica Coria and Åshild K Andreassen.

67. **Xiao-Bing Zhang**
"*Cooperation and Paradoxes in Climate Economics*", 26 March 2015. Discussant: Professor Knut Einar Rosendahl, UMB School of Economics and Business, Norwegian University of Life Sciences.

66. **Kristina Mohlin**
"*Essays on Environmental Taxation and Climate Policy",* September 13 2013. Faculty Opponent Cathrine Hagem, Statistisk sentralbyrå, Norge, Committee: Mads Greaker, Eva Samakovlis, Lena Gipperth.

65. **Jorge Bonilla Londono**
"Essays on the Environmental Economics of Air Quality Control", June 11 2013. Faculty Opponent: Allen Blackman, Committee: Åsa Löfgren, Johan Woxenius, Patrik Söderholm

64. **Clara Villegas Palacio**
"Formal and informal regulations: Enforcement and Compliance", September 23 2011

63. **Miguel Quiroga**
"Microeconomic Policy for Development: Essays on Trade and Environment, Poverty and Education", Dec 04 2009. Faculty opponent is Professor Michael Rauscher from Rostock, Germany. The committee consisted of Joakim Westerlund, GU, Björn Gustafsson, Dept of Social work, Gothenburg, Magnus Blomström, Stockholm.

62. **Markus Wråke**
"European Energy Policy in Transition: Critical Aspects of Emissions Trading", Gothenburg Sept 22, 2009. External discussant, Professor Patrik Söderholm. Luleå Committee: Olof Johansson-Stenman, Economics GU, Björn Sanden, Associate Professor Environmental Systems Analysis, Chalmers; Eva Samakovlis forskningschef för Konjunkturinstitutets miljöekonomiska enhet. This is the first PhD in Environmental Management and Economics.

61. **Jiegen Wei**
"Essays in climate change and forest management", Gothenburg April 6, 2009. External discussant Stephen Polasky, USA, Committee: Johan Stennek, Economics GU, Bo Hellsing, Physics GU, Gunnar Eskeland, Bergen, Norway.

60. **Anders Ekbom**
"Economics Analysis of Soil Capital, Land Use and Agricultural Production in Kenya, Gothenburg 2007, External discussant Edward Barbier, USA, Committee: Jakob Svensson, IIES Stockholm, Arne Bigsten, GU, Johan Rockström, SEI, Stockholm.

59. **Jorge Garcia**
"Essays on Asymmetric Information and Environmental Regulation through Disclosure", Gothenburg March 13, 2007, (supervised jointly with Fredrik Carlsson and Åsa Löfgren), External discussant: **Allen Blackman**, USA; Committee: Rune Stenbacka, Patrick Söderholm and Claes Alvstam.

58. **Wilfred Nyangena**
"Essays on Soil Conservation, Social Capital and Technology Adoption", Gothenburg Feb 10, 2006, (supervised jointly with Gunnar Köhlin), External discussant: **Mary Tiffen**, UK; Committee: Renato Aguilar, Anna Tengberg and Göran Bostedt.

57. **Nasima Chowdhury**
"The Economic Value of Water in the Ganges-Brahmaputra-Meghna (GBM) River Basin", Licentiate of Philosophy. Gothenurg, 2005. Opponent: Karl Göran Mäler.

56. **Johanna Jussila Hammes**
"Essays on the political economy of land use change", Gothenburg Nov 18, 2005, (supervised jointly with Per Fredriksson), External discussant: **Jason Shogren, Wyoming**; Committee: Bo Sandelin, Carl-Johan Gadd and Tomas Sjögren.

55. **Razack Bakari Lokina**
"Efficiency, Risk and Regulation Compliance: Applications to Lake Victoria Fisheries in Tanzania". Gothenburg, June 14, 2005, (supervised jointly with Håkan Eggert), External discussant **Ragnar Tveterås**, Committee: Mattias Skiöld, Ingmarie Andreasson Gren, and Arne Bigsten.

54. **Eseza Kateregga**
"Essays on the Infestation of Lake Victoria by the Water Hyacinth". Gothenburg, January 17, 2005, External discussant **David Pearce**, Committee: Patrik Söderholm, Arne Bigsten and Fred Wenstop.

53. **Jessica Andersson**
"Welfare, Environment and Tourism in Developing Countries", External discussant **Frank Convery**, 21 June 2004, Committee: Olof Johansson-Stenman, Lars Hultkrantz and Gunnar Bengtsson.

52. **Hala Abou-Ali**
"Water and Health in Egypt: An Empirical Analysis", (supervised with O. Johansson-Stenman). Gothenburg, December 16, 2003, External discussant **Vic Adamovicz**, Committee: Lennart Hjalmarsson, Magnus Johannesson, Marie Stenseke.

51. **Edwin Muchapondwa**
"The Economics of Community Based Wildlife Conservation in Zimbabwe", Gothenburg 2003-09-11, External discussant, **Elinor Ostrom**, Bloomington, Indiana, USA. Committee Dominique Anxo, Bo Rothstein, Karl-Göran Mäler.

50. **Åsa Löfgren**
"Environmental Taxation- Empirical and Theoretical Applications", 2003, (supervised with O. Johansson-Stenman). External Discussant: **Winston Harrington**, RFF, USA. Committee: Lennart Hjalmarsson, Tore Berndtson, Per Fredriksson

49. **Martin Linde-Rahr**
"Household Economics of Agriculture and Forestry in Rural Vietnam", PhD in economics, Gothenburg, 2001-12-18, External discussant **Stein Holden**, Ås, Norway, Committee, Arne Bigsten, Stefan de Vylder, Stockholm, Michael Ståhl, Stockholm.

48. **Henrik Hammar**
"Essays on Policy Instruments: Applications to Smoking and the Environment", PhD in economics, Gothenburg, 2001-12-18, External discussant **Prof Reed Johnson**, Triangle Institute, USA (Co-supervisor).

47. **Håkan Eggert**
"Essays on Fishery Economics", PhD in economics, Gothenburg, 2001-05-23, External discussant **Prof James Wilen**, University of California at Davis, USA.

46. **Adolf Mkenda**
"Fishery Resources and Welfare in Rural Zanzibar", PhD in economics, 2001-05-11, External discussant **Prof Anders Skonhoft**, Trondheim, Norway.

45. **Lena Nerhagen**
"Travel Demand and the Value of Time", PhD in economics, Gothenburg, 2001, External discussant **Prof Reed Johnson**, Triangle Institute, USA. (Co-supervisor).

44. **Ingemar Leksell**
"Health Costs of Particle Emissions", Licentiate Thesis in Engineering, Dept of Physical Resource Theory, Chalmers. 2000-04-10, (co-supervisor).

43. **Lena Höglund**
"Essays on Environmental Regulation with Applications to Sweden", 2000-06-16, PhD in economics, Gothenburg, External discussant **Dallas Burtraw**, RFF.

Research

1. The Design of Environmental Economic Policy Instruments

This research focuses on the efficiency, fairness, and political acceptability of policy instruments and how this may be affected by design details or institutional factors used in various sectors or countries. Examples include refunded emission payments, tradable performance standards, sequencing of instruments or the effect of instrument overlap, linking of permits schemes. Instrument design to deal with corruption. Empirical applications may range from the chemicals sector to aviation, large scale nuclear accidents, management of biodiversity, health care and vector borne diseases and so forth. I have earlier done a considerable amount of work on the elasticities of fuel demand in transport. More recently I have looked at residential buildings.

Major topics recently have been the influence of policy design on issues of fairness and political acceptability. We have also formed a collaborative research area within EfD on Emissions Pricing for Development to explore these issues of climate policy in developing countries.

Examples of recent papers: A179, 182 184

2. The Theory and Practice of discounting

Many important environmental issues such as climate change or nuclear power involve very long time periods making the treatment of time crucial. The usual practice of applying one single constant discount factor reduces all values in the distant (and even intermediate) future to virtually nothing. This is ethically questionable and runs contrary to the intuition behind our citizens concern for the future. I have worked to show that discount rates may be falling over time due to uncertainty and to declining growth rates. I have also worked on the use of multiple discount rates or the introduction of relative prices into the same integral framework

where discounting is used. One recent paper that builds among many other things on discounting is A 172 which discusses and questions the conclusions Nordhaus draws from the DICE model (that optimal global temperature increase would be 3.5-4 C) and compares them to the Paris Agreement consensus of staying below 2 C.

3. Resource Management in Developing Countries

This is the main area of work for most of my students and many colleagues and within the EfD and has led for instance to work on the management of game parks and other natural resources. I have worked in particular on the design of different policy instruments to deal with problems related to overfishing, the design of catch shares and the importance of genetic diversity within a species. I have also worked recently on soil, biodiversity, and of course climate issues in developing countries.

Examples of recent papers: A169, A166

4. Finance, asset markets and climate policy

A large new area of recent work (financed by Länsförsäkringar and Formas) focuses on the relationship between climate policy and the financial sector. One set of issues here is to study the effects of major policy events such as the signing of the Paris Agreement on financial markets to understand both issues of stranded assets and also the importance of financing for the transition to a sustainable energy system. Another area here is to study the microeconomic determinants of savings.

5. Attitudes and stated preferences.

I have recently, together with colleagues who are more expert, worked quite a lot on issues of willingness to pay and more broadly attitudes to climate, food labelling, distributional issues, fairness and more complex issues such as for instance the value of being a front-runner in the area of climate policy,

Examples of recent papers: A176, A180, A181

List of Publications

Some of the publications below can be downloaded from ResearchGate.

The publications can also be found on my Google Scholar profile.

The list of publications includes around 331 research titles and over 900 journalistic articles or interviews, speeches etc subdivided under the following headings:
A: Major Research Publications (281 titles)
A.1) 218 Articles in refereed journals
A.2) 16 Books/Monographs (or 20 if translations etc are counted separaely)
