Utlysning

Project Title: Multiomic analysis of paediatric cancer stem cells.

Project duration and dates: 1 year, starting in July 2026

Application deadline: 5 June 2026

Amount: 3750 SEK/week

Supervisor : Helena Caren

Project summary:

We have generated multiomic data sets from paediatric cancer stem cells and neural stem cells and these data sets will be analysed and integrated with the aim to find new tumour drivers that can subsequently be functionally verified in the laboratory.

Application:

Applications should be emailed to Helena Carén, helena.caren@gu.se The application should include; Motivation letter, CV including contact info.
