## PRINCIPAL BIOGRAPHY

I am since 1997 a senior lecturer at the University of Gothenburg, Department of Conservation (UGOT-C), and from 2019 Associate Professor.

Between 1984 and 1992 I was involved in a number of R&D-projects linked to UGOT-C: development of methods and routines for *terrestrial photogrammetry* to be used in conservation applications; *information management* for the conservation area; European cooperation (project *EuroCare*) to develop standards, methods, routines and instrumentation for the conservation area. These projects were to a varying degree base material for my PhD dissertation (1992-97) on photogrammetry and information management within the conservation area.

My *professional experience* includes planning assistant 1983-84 in the local administration of Karlshamn community, Sweden, working with architectural heritage planning, heritage official in 1984 at the regional museum in Vänersborg, Sweden, inventorying built environments, heritage official and deputy manager at Forsvik industrial heritage site, Sweden, between 2004-09 with responsibility for regional strategies for industrial heritage in West Sweden. In this position I was leading R&D-projects on agriculturally based small scale industries to enhance preservation and development of cultural landscapes, as well as projects developing assets and competences for preserving the heritage afloat.

From 1997 to 2008 I combined positions as lecturer and senior lecturer with work in the practice field, and in 2008 I was commissioned *moderator* of the working group for *Heritage Studies* as part of the UGOT initiative on strengthening cross-disciplinary research. This research initiative has through the inaugural conference in Göteborg in 2012, contributed to the establishment of the Association of Critical Heritage Studies with the focus to link heritage scholars across the globe in a network to debate and discuss cutting-edge research in the field of heritage studies.

As a lecturer I have been heavily involved in the development of the bachelor's and master's programs at UGOT-C, but also functioned as a guest lecturer at Chalmers University of Technology, Sweden, in educational cooperation activities between Sweden and the Baltic countries, and at a number of Regional Restoration Camps in the western Balkans, but also as a supervisor and team leader at a student workshop linked to the remains of the Union Carbide facility in Bhopal, India.

Between 2012 and 2018 I was *Head of department* (UGOT-C), and from August 2018 to February 2019 I did a sabbatical in Tirana, Albania, cooperating with Cultural Heritage without Borders Albania (<http://chwb.org/albania/>), and the Department of Archaeology and Heritage Studies, University of Tirana (<http://www.unitir.edu.al/index.php?lang=sq>). In focus for this were partly questions about how cultural *heritage processes* can be a *resource for conflict resolution*, and partly how heritage could be an asset for economic development – specifically in terms of revitalized crafts skills.

European landscape convention and questions related to *cultural landscapes*, vernacular building traditions as well as agriculturally based industrial production, constitutes a context for several issues that is under process of being developed into future research tasks, and I am presently co-managing a Erasmus+ Strategic Partnership on Sustainable Management of Cultural Landscapes with partners in UK, Germany, Poland, France, Slovakia, Czech republic, Hungary, Italy and Spain. (<https://ec.europa.eu/programmes/erasmus-plus/projects/eplus-project-details/#project/db74786c-d5d7-4410-8fdb-8871bddf0449>)

Since 2019 I am a member of the managerial group for the Landscape Observatory Västra Götaland (West Sweden) with the aim to find cross-professional and cross-disciplinary approaches to sustainable management and development of landscapes. From October 2021 and onwards, I am acting as the Lead Scientific Coordinator for ICOMOS in the CHARTER Alliance project (<https://charter-alliance.eu/>) – an Erasmus+ Strategic partnership 2021-24

To summarize: through my activities within the academia as well as in the practice field, I have been able to pursue research developing activities over the years in areas ranging from *methods for documentation and recording* of physical properties of heritage; *industrial heritage* and the possibilities to develop such remains for the benefit of continued societal development including *maritime heritage* – both the heritage afloat as well as coastal communities – and the problems but also the possibilities in incorporating it into heritage practices; into broader concepts of the *landscape* as the base for human activities and the arena for present and future societal development.

I am as well:

- The ICOMOS Sweden National representative to ICOMOS CIF (the committee on training) (<http://www.icomos.se/en/internationella-kommitteer/utbildning/>),
- The Vice Chairman of Cultural Heritage without Borders Sweden (<http://chwb.org/>),
- University of Gothenburg representative to UNISCAPE (<http://www.uniscape.eu/>)
- Ecocycles Vice President for Northern Europe (<https://www.ecocycles.net/archived/>),
- Faculty representative in the Centre for Tourism, University of Gothenburg (<https://cft.handels.gu.se/english>)

My pre-university experience includes Social science program from the Swedish gymnasium level (upper secondary level), military service in signal corps, and service in the UNEF II battalions 68M and 70M in the Sinai desert (Oct 1977 to Dec 1978).
