Experience

Doctoral student

2016 – Present

Department of Economics

University of Gothenburg

- PhD student in economics with PhD Annika Lindskog, Prof. Olof Johansson-Stenman, and Prof. Peter Martinsson as my supervisors. In my work, I independently develop research ideas, make statistical analyses, get research funding, and create networks of people to work with. My main research interest is behavioural economics applied on health and educational choices.
- One of my working papers on this theme is titled *Time Preferences and Medication Adherence: A Field Experiment with Pregnant Women in South Africa*. It is co-authored with Christina Gravert (University of Copenhagen), Kai Barron (WZB Berlin), and Mette Trier Damgaard (Aarhus University). It is financed by the Bill and Melinda Gates Foundation, and the Trygg-Hansa Forskningsstiftelse, and is done in collaboration with the South African National Department of Health. Available at: <https://ideas.repec.org/p/kud/kucebi/2029.html>
- Work as a teacher on a master level course in global health, giving lectures on behavioural health and statistical models for health policy evaluation. Have also been a thesis advisor of a master student and a teaching assistant in bachelor level macroeconomics (6 times), applied economics and trade (3 times), international economics, and statistics.

Guest lecturer

2016

Department of Economics

National University of Laos

- Received a scholarship from the Swedish government to gather data for my Master thesis at the National University of Laos in Vientiane. During my stay, I was upon request giving two guest lectures at the bachelor and master level on behavioural economics and research methodology.

Research assistant

2015 – 2016

Center for Social and Affective Neuroscience

Linköping University

- Worked for a research team, led by Professor Markus Heilig, involved in several projects were economics cross over with psychology and neurology.
- I assisted in the magnetic resonance imaging (MRI) experiments with clinical patients with alcohol dependence. I also worked with MRI and facial electromyography (EMG) methods in projects focusing on teenagers' decision-making, as they experience social punishment.

Teacher

2015 – 2016

Department of Management and Engineering

Linköping University

- Worked as a teacher in multiple subjects at Linköping University. I gave lectures and lessons on international credit and currency markets. I also taught macroeconomics and international economics.

Research assistant

2015

Researchers at Yale University, University of Nottingham

- Prepared and conducted economic experiments in Sweden for PhD Jonathan Schulz, Yale University, and Professor Simon Gächter, University of Nottingham. The research project was about cultural differences and I worked as an experiment leader, recruiting students, translating, and fine-tuning instructions.
- Gächter and Schulz published the paper "Intrinsic honesty and the prevalence of rule violations across societies." from this data material in *Nature* (2016).

Business developer

2014 – 2015

LiU Innovation

Linköping University

- Worked extra as a business developer, focusing on life science and medicine innovations discovered by researchers at Linköping University.
- One of my projects was on early diagnostics for Alzheimer's disease. I estimated the value of the pending patent, made a market analysis, and contacted companies in Scandinavia and in the United Kingdom who could be interested in buying the patent from the professor I was working with.

Other work

- Worked part-time as a student counsellor at the business and economics department at Linköping University. For two summers, I was a cook in a restaurant. For one year, I studied French and worked as an Au pair with a family in Brussels. Before that, I was working extra as a saleswoman in a bridal wear shop.

Education
